

Silobreaker Physical Risk Intelligence

Confidently make risk management decisions and enhance crisis response with the latest intelligence on physical risks impacting global business, regional stability and cyber security.

Protect people, infrastructure and assets with confidence

Streamline your organisation’s intelligence process and start generating actionable physical risk intelligence faster, in hours or even minutes. Silobreaker collects and connects more intelligence on protests, conflict zones, terrorist groups, abductions and attacks – as well as pandemics, natural disasters and extreme weather conditions – in a single place. Accelerate intelligence analysis and bring reporting and dissemination together in a single workflow to save time, increase ROI and make intelligence-led decisions faster.

Deliver confident intelligence from the full data set

Whatever your needs, Silobreaker experts support you to ensure all stakeholder priority intelligence requirements (PIRs) are met, whether your goal is to protect military personnel or employees, government officials, humanitarian workers or citizens who are simply trying to protect themselves.

Based on PIRs, the Silobreaker Intelligence Hub will automatically select, collect and aggregate the most comprehensive range of intelligence data. With over 10 years of source curation, your organisation can access even the most inaccessible data, from text-heavy OSINT data, such as blogs, Twitter, news sites and finished intelligence reports, to deep and dark web chatter and Telegram chats.

Detect, track and connect events at speed

Silobreaker’s Relevance Engine analyses the Silobreaker data set to provide automatic translation, deduplication and clustering techniques to increase threat intelligence efficiency and concentrate investigative efforts.

With millisecond results, unique multi-lingual entity detection and aliasing, can identify the people, place names, assets and threat terms you need to track. This presents a holistic picture of events, connecting news stories, reports, social media and messaging on the ground. By linking this information back to your locations, brands and people, Silobreaker helps you always stay prepared.

CREATE A NEW REALITY

- Meet more PIRs with a single platform - tracking regional threats, protests, terrorism, health, weather and cyber threats
- Increase efficiency with automated data collection, aggregation and processing from millions of sources
- Reveal connections between threats and visualise geographic hotspots of activity in milliseconds
- Push actionable intelligence reports and schedule alerts straight from the platform
- Preserve findings to backup or re-evaluate incident response at any time

Save valuable time with one connected workflow

The Silobreaker Workspace brings intelligence analysis and dissemination together in one collaborative workflow.

Threat intelligence teams can scale capacity instantly, with a library of customisable dashboards featuring a comprehensive suite of analytical tools visualising the Relevance Engine's analysis. This enables teams to easily understand events in the context of operations, locations and citizens, and track the emergence of related cyber threats.

Intuitive search queries and visualisations allow teams to effortlessly navigate through millions of documents and hone in on the most relevant information to meet your needs. Integrated dissemination tools enable teams to collaborate on, schedule and send customisable alerts and reports to any member of your organisation – even those without Silobreaker access – all from one platform.

Primary physical risk intelligence use cases

AREAS OF OPERATIONAL MONITORING

Visualise a set of assets or locations in relation to reporting on the ground. Track how they're mentioned in the context of regional instability factors including riots and protests, crime, terrorism, health risks and natural disasters.

CONFLICT MONITORING

Determine the likelihood of attacks in conflict zones by analysing aggregated social media, messaging platform chats, news feeds and specialist finished intelligence sources in one place and to understand situations in context.

PROTESTS AND ACTIVISM

Connect social media mentions, news reports, locations and organisation names to help determine the likelihood of a protest occurring in a given location at a particular time to make informed decisions about where – and how many – resources should be deployed.

CONVERGING THREATS

Understand the relationship between physical security incidents and cyber threats with a single console that can provide a strategic view of threat actor groups – including their intentions, tactics and links to ideological causes or nation-states – to make actionable changes to your organisation's risk profile.

Start delivering faster and better-quality insight today

Silobreaker provides everything you need to make intelligence-led decisions. Faster

86% Faster actionable intelligence

Accelerate the intelligence cycle with a single workflow, providing aggregation, contextualisation and dissemination of intelligence.

27% Improved analyst productivity

Provide faster and higher-quality insight with automated and PIR-driven intelligence from millions of sources curated for over ten years.

401%+ Return on investment

Answer more security use cases with a single tool, streamline operational costs and improve decision-making from more actionable intelligence.
