Silobreaker

Third Party and Supply Chain Risk Intelligence

Monitor your supply chain and third party risks

Third party suppliers and business partners are integral to daily operations, yet they also present a significant risk to every organization. Attacks on third parties were responsible for nearly 30% of breaches last year, with the healthcare and finance industries being the most victimized.

The Silobreaker Intelligence Platform

Silobreaker helps organizations reduce exposure to third party risk, providing essential visibility into your suppliers' security posture, breach history and ransomware incidents.

Monitor for exposure and increased risk
Track all suppliers that are critical to your operations and would cause major disruption if compromised. Implement continuous monitoring to detect breaches, ransomware incidents or insider threats promptly, ensuring you can react with enough time to protect your business.

Enhance supplier oversight
A rapidly evolving threat landscape makes it difficult to stay ahead of strategic risks. From supply chain disruption to nation-state activity, automate your routine assessments with powerful analytics and data collection from open, deep, dark and social media sources.

Streamline procurement and onboarding
Augment your vendor assessment process to reduce onboarding risk and understand whether existing third party suppliers are staying within your organization's risk tolerance levels.
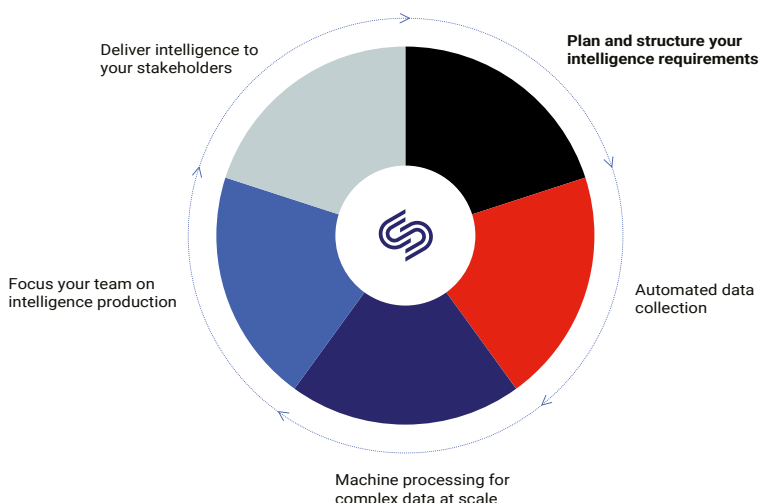

Capabilities

- Centralized dashboards and unlimited watchlists for tracking supplier incidents
- Real-time alerts for breaches and ransomware threats within your supply chain
- Actor and industry-specific threat intelligence from OSINT and dark web
- Daily briefs and finished intelligence on third party risk events
- Supplier validation and onboarding with dedicated customer success team

Discover the difference Silobreaker can make

Higher quality insights delivered at unprecedented speed
Gain access to an extensive range of sources, including open, social, deep and dark web. Our platform aggregates vast amounts of data in real-time, to provide consistent visibility and reliable alerts to effectively manage vendor risk.

Deliver intelligence to your stakeholders

Plan and structure your intelligence requirements

Focus your team on intelligence production

Automated data collection

Machine processing for complex data at scale

Improve operational efficiency
Streamline the intelligence cycle by automating data collection, intelligence production and delivery into a single platform. Vendors, partners and suppliers can be tracked efficiently using a centralized dashboard and custom watchlists to identify potential risks and exposure, saving manual efforts and accelerating output.

Reduced risk to your organization
Fulfil stakeholder priority intelligence requirements (PIRs) relevant to your risk profile. Monitor, analyze and respond to emerging threats in real-time to reduce supply chain risk and safeguard your business ahead of impact.

Onboarding with dedicated customer success team
Our experienced team will quickly get you up and running to achieve your short- and long-term business goals, enabling you to stay ahead of third party and supply chain risks and maximize the value of Silobreaker from the outset.
