Silobreaker

Cyber Threat Intelligence
Reduce the risk of cyberattacks

Thousands of cyberattacks and data breaches occur every day, making it more important than ever for organizations to understand the risks they face, anticipate potential threats, and arm themselves with the intelligence needed to address them.

The Silobreaker Intelligence Platform

The Silobreaker intelligence platform provides comprehensive cyber threat intelligence that empowers stakeholders to make proactive, intelligence-led decisions to mitigate emerging risks and strengthen operational resilience.

Adapt to a changing threat landscape
Stay up to date with the evolving threat landscape in which you operate by keeping track of new research and information on threat actors, malware, active campaigns and TTPs.

### Better understand your adversaries
Monitor changes in adversary behavior, capabilities and intentions. Leverage powerful analytical tools to gain a deep understanding of threat actors and malware, to better protect your business assets.

Navigate cyber and geopolitical change
In today's interconnected world, cyber risks are often intertwined with geopolitical tensions. Think strategically about risk with insights into how global events and cyber campaigns will impact your security posture.
Capabilities

- Unrivalled visibility across millions of OSINT and dark web sources in near real-time
- Comprehensive data on global threat actors and their evolving TTPs
- Vulnerability assessments tailored to your unique tech stack
- Finished intelligence reports and daily summaries on actors and events
- AI-enhanced report building and customizable alerting for key stakeholders
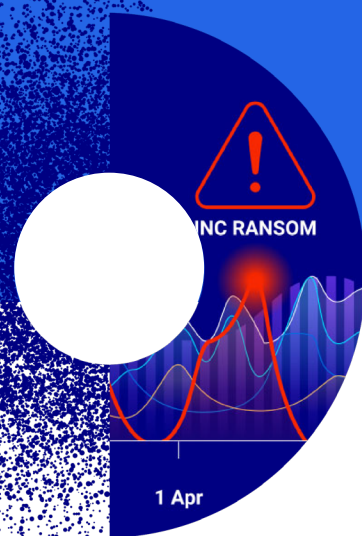

Discover the difference Silobreaker can make

Higher quality insights delivered at unprecedented speed

Collect and aggregate the most comprehensive datasets including OSINT, deep, dark web and finished intelligence sources. Deliver reliable, timely intelligence on threat actors and their evolving TTPs, relevant to your organization, based on real-time data.

Deliver intelligence to your stakeholders

Plan and structure your intelligence requirements

Focus your team on intelligence production

Automated data collection

Machine processing for complex data at scale

Improved operational efficiency

Streamline the intelligence cycle by automating data collection, intelligence production and delivery through one single platform. This helps improve collaboration and efficiency in your workflow, so you can focus on scaling your security team and accelerating output.

Reduced risk to your organization

Fulfil stakeholder priority intelligence requirements (PIRs) relevant to your risk profile. Empower decision-makers to see the bigger picture with multi-disciplinary intelligence, so they can reduce the risk of emerging cyberattacks and improve operational resilience.

Centralise all your cyber intelligence use cases

Ransomware Intelligence

Identify ransomware targeting your organization, industry or third parties. Profile threat actors and TTPs to deliver actionable intelligence.

Phishing Intelligence

Detect phishing campaigns targeting your organization, employees or customers with contextual analysis of threat actors, domains and infrastructure, so you can eliminate threats.

Data Breaches

Be ready to respond when data breaches happen and monitor for third party breaches that could impact your supply chain due to malware, ransomware and DDoS attacks.

About Silobreaker

Silobreaker is a leading security and threat intelligence technology company, that provides powerful insights on emerging risks and opportunities in near-real time. It automates the collection, aggregation and analysis of data from open and dark web sources in a single platform, allowing intelligence teams to produce and disseminate high-quality, actionable reports in line with priority intelligence requirements (PIRs). This enables global enterprises to make intelligence-led decisions to safeguard their business from cyber, physical, and geopolitical threats, mitigate risks and maximize business value.
