Silobreaker + dragonfly FROM DOW JONES

INTEGRATION PARTNER

Reducing Hybrid Threat Risk with Enriched Intelligence

Silobreaker's SaaS platform connects the entire intelligence cycle, allowing users to combine Dragonfly's Security Intelligence & Analysis Service (SIAS) with open-source and technical cyber threat intelligence to deliver enriched, forward-looking intelligence across cyber, physical security, and geopolitical domains. This integration helps teams anticipate, analyze, and respond to hybrid threats with unmatched speed, depth and collaboration.

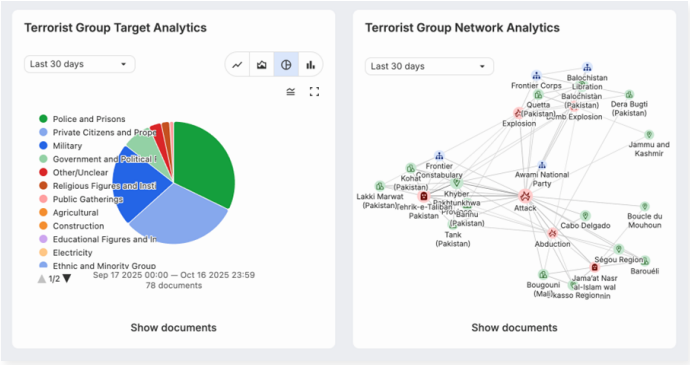
Increase intelligence quality and context

Dragonfly's SIAS provides authoritative, forward-looking assessments that enable teams to anticipate geopolitical and security risks. By integrating SIAS with Silobreaker, intelligence teams gain an end-to-end workflow that unifies requirement management, automated data collection, structured AI-augmented analysis, and dissemination — driving faster, higher-quality output.

Silobreaker enables fusion between Dragonfly's strategic and operational intelligence and other trusted sources covering cyber or technical domains, providing context that spans the cyber–geopolitical–physical nexus.

Unifying intelligence across domains

As today's threat landscape evolves across cyber, physical, and geopolitical dimensions, teams need to integrate context from multiple sources. Connecting your SIAS subscription within Silobreaker allows you to:



Fuse SIAS intelligence with open-source, deep and dark web, other trusted intelligence sources, and your organization's internal reporting to achieve operational forewarning and situational awareness — identifying evolving threats and cross-domain linkages.

Automatically correlate SIAS insights with your intelligence requirements and organizational exposures — such as locations, industries, supply chains and technology stacks — to immediately focus on which threats matter most and prioritize response.

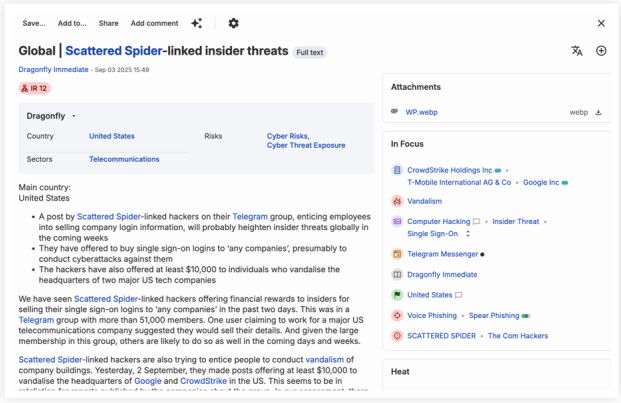
Monitor and anticipate evolving risks through global country and city risk scoring, forward-looking forecasts and strategic outlooks, integrated with Silobreaker's analytics to track and visualize change over time.

Enhance travel, logistics and executive protection programs by combining Dragonfly's travel risks and terrorism event datasets on SIAS with Silobreaker's advanced analytics and geospatial alerting tools.

This integration helps organizations operate with greater clarity and foresight — empowering collaboration across security, risk, intelligence and compliance teams.

Connection to SIAS is quick and easy

The Silobreaker team activates your SIAS licence within the platform, automatically ingesting all content as it is published — allowing analysts to search, pivot and correlate across millions of data points in real time.



Investigate and validate threats faster
SIAS's trusted assessments appear directly in Silobreaker to help analysts:

- Validate emerging incidents and open-source reporting against authoritative Flash, Immediate, Priority Reports.
- Integrate Briefs and Weekly Intelligence Summaries into ongoing investigations and threat monitoring workflows.
- Use Silobreaker's entity detection, visual analytics, and automated tagging to uncover related indicators, actors and regions.

Anticipate change with forecasting and trend intelligence
Use Dragonfly's Geostrategic Estimate and Strategic Outlook in Silobreaker to:

- Identify geopolitical and security trends likely to drive cyber or physical risk in the coming months.
- Overlay forecasts with incident data, supply chain exposure, or regional risk maps.
- Provide executives with concise, evidence-based foresight integrated into existing reporting flows.

Get relevance from data at scale
Silobreaker's analytics engine parses Dragonfly's intelligence to extract key entities — countries, organizations, threat actors, incidents and violent groups — at scale. This enables rapid filtering and correlation of Dragonfly's SIAS content with open and proprietary data, amplifying the value of every report.

Dragonfly Country Cyber Risk Ratings

entitytype:"Country"

Name	Cyber Threat Exposure	Personal Cyber Risk	National Cyber Resilience
Iran	severe	critical	high
China	severe	critical	low
Russia	critical	critical	low
North Korea	negligible	critical	critical
Vietnam	moderate	severe	moderate
Venezuela	low	severe	high
Turkmenistan	negligible	severe	critical

Stay ahead of threats with Silobreaker and Dragonfly

Together, Dragonfly's intelligence and Silobreaker's technology empower teams to connect the dots across hybrid risks — from geopolitical instability and terrorism to cyber campaigns and disinformation — providing the insight and foresight needed for confident, intelligence-led decision-making to better protect operations, assets and personnel.

About Silobreaker

Silobreaker is a leading security and threat intelligence technology company, that provides powerful insights on emerging risks and opportunities in near-real time. It automates the collection, aggregation and analysis of data from open and dark web sources in a single platform, allowing intelligence teams to produce and disseminate high-quality, actionable reports in line with priority intelligence requirements (PIRs). This enables global enterprises to make intelligence-led decisions to safeguard their business from cyber, physical, and geopolitical threats, mitigate risks and maximize business value.
